

ECSP3000 Weekly Meeting Report

Elliott Jelbert
Supervisor: BooJoong Kang

Week 1

What's Been Done:

- **Project Brief Submission** (Ready for submission): Project Brief's sections: Aims, Objectives & Scope are complete within the 1 page limit.
- **Research** (On-Going): I have found several relevant papers but need pointers on how to find certain papers that arent available on the University Library Search.

Challenges:

- I couldn't fit all relevant details onto my project brief such as the specific methodology I will use or exact definitions of reproducibility, timely etc. I'm hoping this is okay at this stage and will address this in the later submissions.
- I couldn't find in the University's Library specific relevant papers. I'm looking for a way around this perhaps by talking to the Librarian.

Questions:

- Is my current Project Brief okay for submission?
- If we used ideas from other papers in our Project Brief do we need to cite them? As all the example Briefs shown to us have no citations.
- Do I need to apply for ethical approval or need to have some kind of ethical considerations due to the development of malicious software in my project?

Next Actions:

- Complete any final tweaks to the Project Brief and Submit.
 - Continue my research into the various relevant areas of my project.
-
